

PayID integration Send and Receive

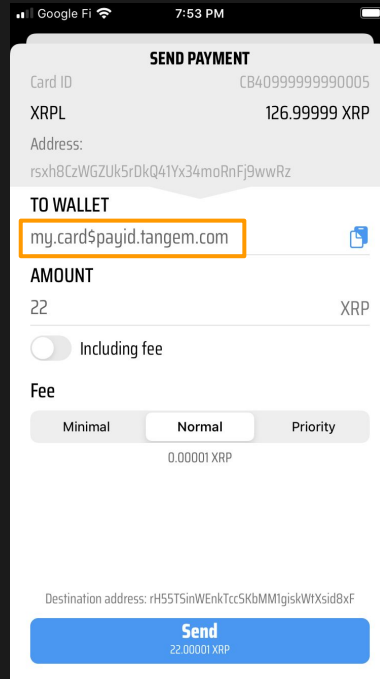

Live on Tangem app on June 18th 2020

Send from a XRP Tangem Card 1/2

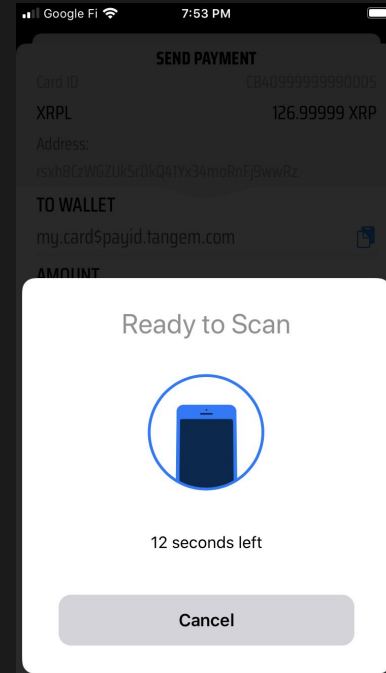

SCAN TANGEM CARD

Tap the card briefly on your phone to check the wallet balance. Press "Extract" to send XRP.

SEND PAYMENT

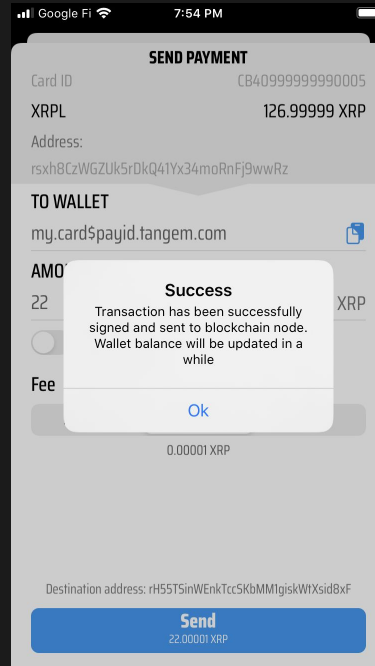

Fill in the recipient's PayID address and the amount. Press "Send" to proceed.

SIGN TRANSACTION

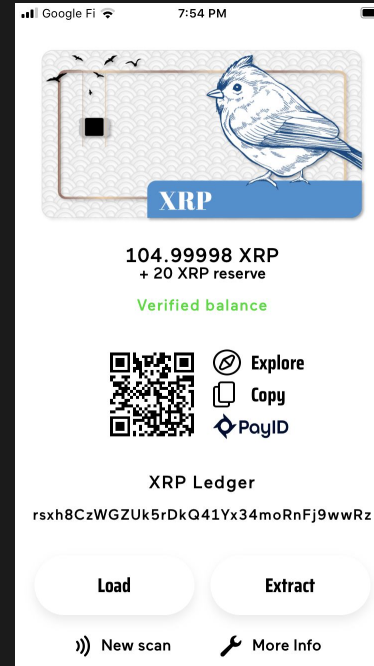

Tap the card on your phone until the countdown is completed to clear the security delay.

Send from a XRP Tangem Card 2/2

PAYMENT SENT

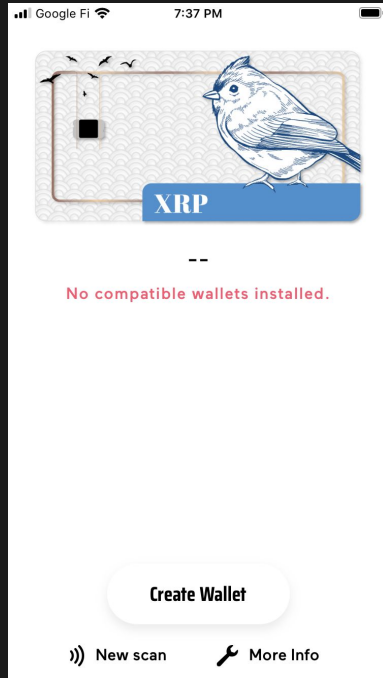

A confirmation message indicates that the transaction is signed and broadcasted.

VERIFY NEW BALANCE

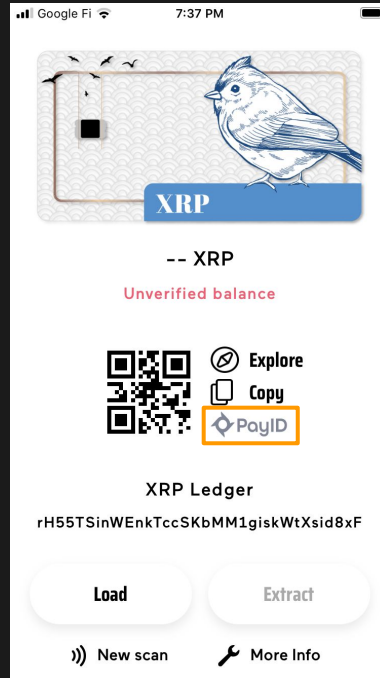

Once the transaction is confirmed on blockchain, you can check the remaining XRP balance.

Receive to a XRP Tangem Card 1/2

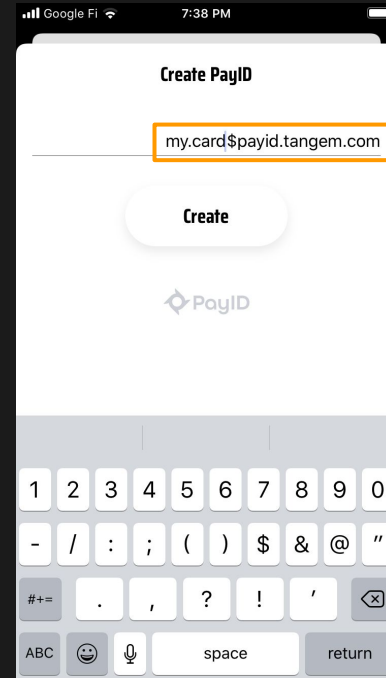

SCAN TANGEM CARD

Tap the card briefly on your phone to check your new card. Press "Create Wallet" to generate a keypair within the card chip.

NEW WALLET

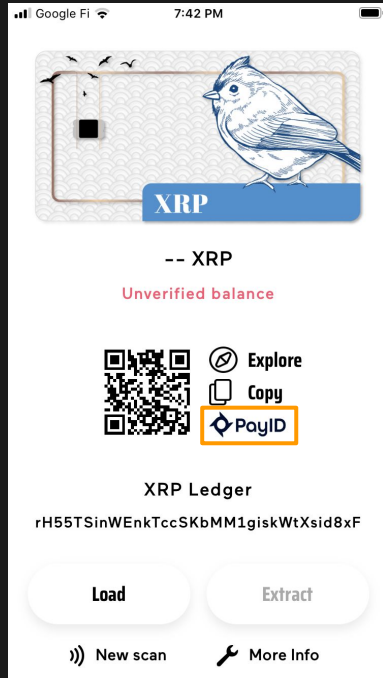

You can see your new wallet address. The PayID logo is grey because it is not yet provisioned. Press it to create your card's PayID address.

CREATE PayID ADDRESS

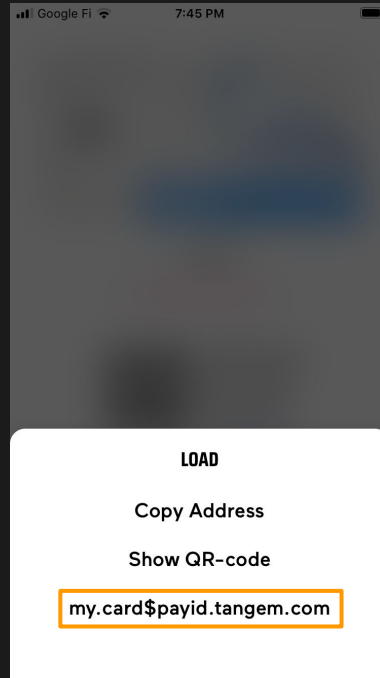

Input something that is easy to remember, or your whole email, and press "Create"

Receive to a XRP Tangem Card 2/2

PayID IS SET

The PayID logo is now black.
Press on it to read this card's PayID.

COPY TO CLIPBOARD

If you are afraid to misspell your PayID,
tap on it to copy it to clipboard.

RECEIVE A PAYMENT

Give your card's PayID to any payer,
who can use it to send XRP to you.
Refresh your screen to check your
new balance after the payment.
